BENEFITS
BENEFITS
BENEFITS
BENEFITS

BENEFITS

Reduce the pressure and make a turn for the better.

Improved tissue viability for healing and prevention of pressure sores

Extends the time between turns due to Continuous Lateral Rotation Therapy (CLRT) (good results with patients with MS and MND)

Prevents pressure points developing at vulnerable sites

Better night's sleep equates to improved wellbeing

Continuous movement to promote improved blood and lymph flow

Less disturbance to husband/wife/partner/carer

Can speed up discharge from hospital as a less comprehensive home care package is required

Lower care costs due to less frequent care visits

BENEFITS

FEATURES

The KomfiTilt system is placed on the bed frame under the mattress and is operated on an independent power and pump supply.

The KomfiTilt system gently tilts the user through a **left-neutral-right** cycle to relieve or prevent pressure points developing

FEATURES

Right

“My patient has for the first time in ages slept all night and does not notice the system turning her but knows that it is as when she does wake up he is in a different position. Her partner no longer needs to get up during the night to alter her position therefore she is getting an undisturbed full nights sleep. From the therapy perspective this equipment has met all goals set.”

Community Occupational Therapist, Havant & Waterlooville, Southern Health NHS Foundation Trust

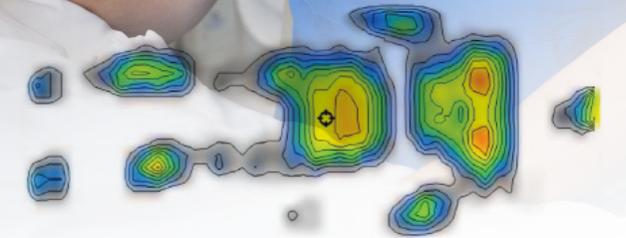

Fits on any bed (underneath the mattress)

Can be used with foam and alternating air mattresses

Can be used with profiling beds (back angle adjustment, Trendelenburg / AntiTrendelenburg, knee break)

Unique auto-deflate CPR function on switch off system deflates for patient transfer and personal care etc

Rental options available (minimum 10 day rental period)

When switched ON the KomfiTilt system inflates to 20° to 25° to provide offload of pressure points and redistribution of body weight loadings.

We constantly evolve our products to stay at the forefront of technology and patient solutions.

Bluetooth Connection to App, monitor the KomfiTilt performance and make remote function adjustments.

Download and connect to your KomfiTilt via Bluetooth

Input Model No: (e.g. SQ-BT1955) this model number can be found on the pump box. When connected, a tracking record will show on the graph (the two colours represent the different cells).

Cycle Time adjustment

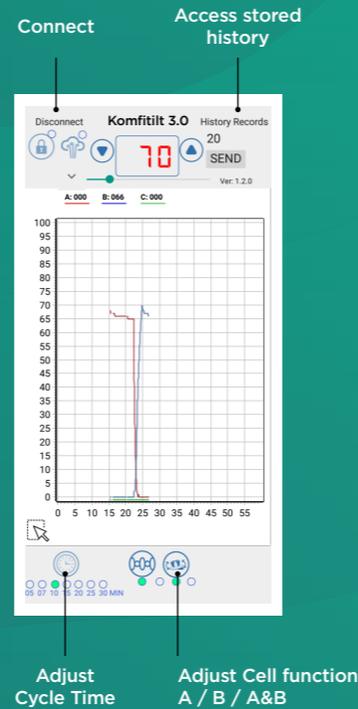

Press the 'Clock' icon and an audible alarm will sound and the green light will move to the next setting (cycle time can be adjusted between 10 / 15 / 20 / 25 minutes)

Cell Lock-Off

Press the 'Cell Tilt' icon and an audible alarm will sound and the green light will move to the next setting (B / A & B / A)

History Records

Press the 'History Records' and select from the list to show the stored record.

Additional features of KomfiTilt Ed.3.0

www.vikta.co.uk

Integral pressure sensors for calibrated support

Audio & visual alarm for air-loss or low pressure fault

Audio & visual alarm for power supply failure

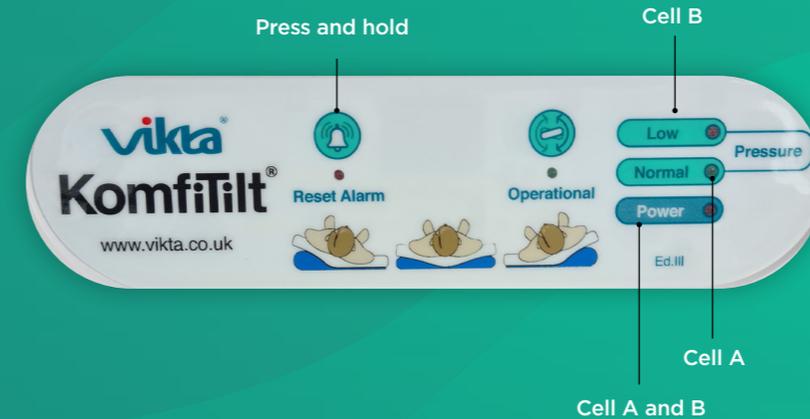

Modern compact design

Clear interface display

Normal ON/OFF function will activate Left-Supine-Right (A-B) function of the cells

Air Hose Connectors & Cpr Release

MANUAL LOCK-OFF OF LEFT OR RIGHT CELL

To Lock-Off either the Right or Left cell, so that it doesn't inflate during the operational cycle: On Start-Up, switch the power ON and the faceplate lights will light up.

Cell A only

Press the 'Reset Alarm' button and hold down. The 'Normal' green light will flash and the audible alarm will sound. Release the 'Reset Alarm' button and the KomfiTilt will function inflating cell A only.

Cell B only

Press the 'Reset Alarm' button again and hold down. The 'Low' red light will flash and the audible alarm will sound. Release the 'Reset Alarm' button and the KomfiTilt will function inflating cell B only.

Cell A & B in normal rotation

Press the 'Reset Alarm' button again and hold down. The 'Power' green light will flash and the audible alarm will sound. Release the 'Reset Alarm' button and the KomfiTilt will function inflating cell A & B in the normal rotation.

Great results with the Vikta KomfiTilt with a patient of mine who has a Grade 4 Sacral Pressure Sore that the Community Nurse had been attempting to heal for the past year.

My patient has MS is unable to alter her position in bed, contractures in lower limbs. The Vikta KomfiTilt was placed under her alternating mattress 8 weeks ago and now the sore has reduced in size and has healed.

The Community Nurses and the patients partner feel that the Vikta KomfiTilt is the reason for the great result and that the pressure sore should continue to fully heal.
