PosiPerle & PosiPillow

Microbeaded Positioning Cushions
PneumaPure Filtration Technology
Proven Infection Control
Multi Patient Use

HOW IT WORKS?

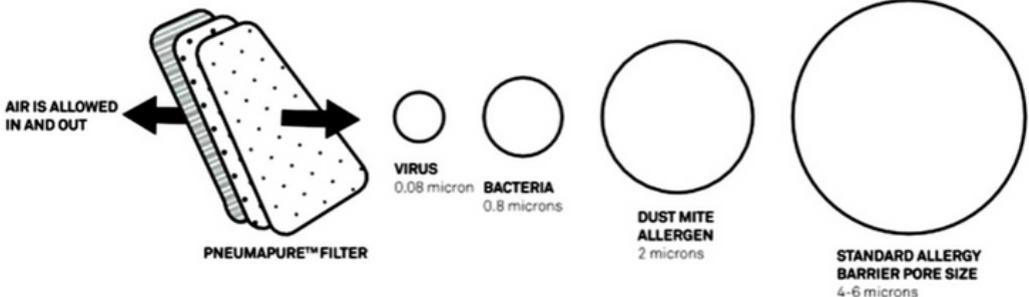

Clinically proven barrier to pathogen ingress, yet well ventilated, breathable and comfortable.

Patented bedding range, clinically proven to block viruses, allergens, microbes and mold.

Hermetically sealed cushioning device keeps pathogens out, because there is no stitching.

PosiPerle Cushions

Cotton & Bamboo Covers

Cotton and bamboo covers are available for the full PosiPerle range.

The bamboo cover shown is made of a more natural wicking, breathable material.

The covers are made with an easy access zip opening. Allowing the cushion to be taken out and the cover to be machine washed.

Cotton Cover

Foot & Heels

The Equinus Foot

Depending on how the patient compensates for the inability to bend the ankle properly as a consequence of Equinus foot, this may cause other conditions such as pressure sores forming on the ball of the foot or arch

NEG0609 Heel Cushion **XL**

Combination of **NEG0609** Heel Cushion and **PP8016** Universal **XL**

Foot & Heels

This shows the Delta **PP8013** under the knees, using the **NEG1642** as abduction cushions with the **PP8013** at the foot of the bed. The second example shows the **PP8050** – Delta **XS**.

To help prevent conditions such as Equinus foot, cushion such as our **PP8013** Delta **XL** or **PP8050 XS** can be placed at the bottom of the bed supporting the foot and heel.

The microbeads inside the cushion allows for the foot movement and reduces the risk of cramp

Stabilegs and Foam Through Leg Cushion

Stabilegs

NEG1075

The Stabilegs consists of a base cushion, 3 cylindrical cushions and one long cushion for the heels to sit on as you can see in the example.

The cushions are held in place by Velcro and the option of using the strap to support the legs

Foam Through Leg Cushion

F22996 Foam through leg cushion, great for leg alignment

Positioning Examples

Positioning Example Overviews

The Half Moon XL (**PP8012**) together with the Cylindrical cushion XL (**PP8015**)

The Half Moon cushion XL (**PP8012**) together with the Delta XL (**PP8013**) for knees flexion

The Half Moon XL (**PP8012**) together with the Semi Fowler XL (**PP8014**) for leg positioning and pressure relief on heel areas

2 x Half Moon XL (**PP8012**) and a Cylindrical XL (**PP8015**)

Positioning Example Overviews

1 Cylindrical XS (**PP8033**) behind the head, 1 Half Moon XL (**PP8012**) wrapped under the legs and 1 Cylindrical XL (**PP8015**) under the feet

Universal XL (**PP8016**) for under the head, Delta XL (**PP8013**) for back support
Universal S (**PP8017**) for under the arm
Cylindrical XL (**PP8015**) for between the legs

Universal XL (**PP8016**) for under the head, Half Moon XL (**PP8012**) for back support and between the legs and a Universal S (**PP8017**) for the arm

Delta XL (**PP8013**) for side lying support, Cylindrical XL (**PP8015**) between the legs and Universal XL (**PP8016**) under the head

Positioning Example Overviews

Decubitus Cushion XL (**PP8011**)
supporting the back and
between the knees and a
Universal XL (**PP8016**) under
the head

Delta Cushion XL (**PP8013**)
support from the front of the
patient and a Universal XL
(**PP8016**) between the knees

Half Moon XL (**PP8012**)
supporting the head and
between the legs and a
Universal XL (**PP8016**) between
the ankles

Breathable mechanical **PneumaPure** filter allows clean air flow into the cushions, blocking out pathogens and allergens

Tested pathogens include:

MRSA

Aspergillus niger

C.difficile

Norovirus

E.coli

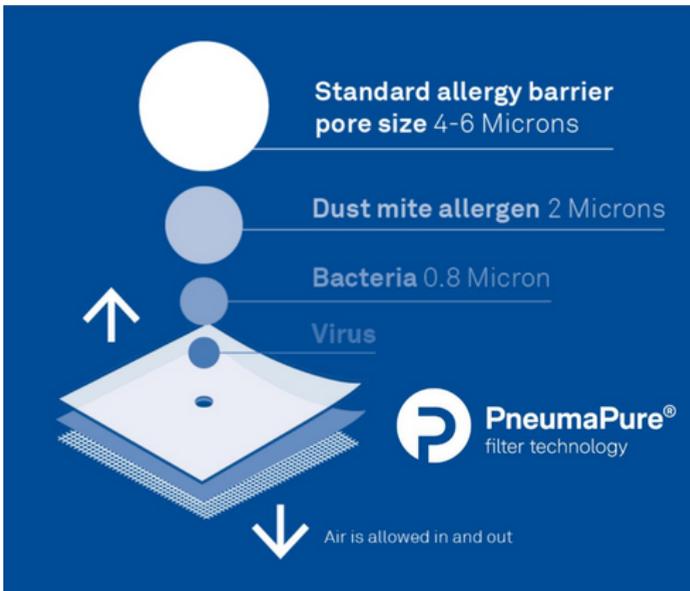

Influenza Type A

Pseudomonas aeruginosa

Adenovirus 5

Candida albicans

Coronavirus 229E (HcoV229E)

Features & Advantages

Durable, soft touch and high performance textile that blocks out contaminants. Vapour permeable and waterproof.

Heat sealed seams provide complete barrier - no stitching holes.

Breathable mechanical filter that allows clean air flow into the pillow but blocks out pathogens and allergens.

Certified as Class I Medical devices in the EU
Registered Class I Medical Device with the FDA
Approved and registered with the SFDA

Easy to clean, safe to use
For normal cleaning use mild detergent and water solution,
avoid abrasive scrubbing of the filter and fabric;
Do not bleach, do not machine wash, do not dry clean, do
not tumble dry, do not iron;
Follow instructions for the best result.

Flo-Form Fluidised Gel Positioners

Fluidised Positioners

FS100 Adult Positioner

- Contours and supports the body to offload the Scapula and Sacrum
- Maintains the Therapeutic Positioning
- Promotes neutral body alignment
- Facilitates tube/line management
- Supports the neck and shoulders to offload the occiput
- Supports the Cervical Spine
- Promotes neutral Spine alignment
- Facilitates tube/line management
- Protects the ears, nose and face against shear and friction

With its fluidised technology, Flo-Form can be moulded to any shape and will hold its form until it is remoulded. With its unique characteristic, Flo-Form is an excellent medium for patient positioning and pressure redistribution.

Fluidised positioning devices (FPD's) are comprised of lubricated microspheres, giving them the ability to 3 - dimensionally contour to the patients specific shape

Neonatal Positioners

- Creates a soft outer boundary to support a flexed, midline position
- Helps maintain neutral body alignment and positive airway
- Encourages normal musculoskeletal and neuromotor development
- Recommended for single patient use

FF1824 Neonatal Large Positioner

- Redistributes pressure to protect the skin
- Helps reduce lateral skull flattening
- Promotes neutral head/trunk alignment
- Facilitates tube/line management
- Recommended for single patient use

FF7010 Neonatal Head Positioner

Weighted Tail Cushion Covers

Weighted Tail Cushion

Our 'weighted tail' cushion covers are cleverly designed to completely eliminate the seat cushion to slide on a riser recliner chair whilst the chair is being risen, enabling the cushion to safely stay in place for the user

- Additional cushion stays safely in the chair when rising
- Designed with 'weighted tail' tabs which are welded into the seam of the cover
- Stretch vapour- permeable fabric
- Can be used with multiple pressure care cushions
- Heat welded seams and zipped for easy access

SPECIFICATIONS

Fitted under patient mattress

Automated Cycle Times

Compatible with profiling beds and most mattress types

Fits on beds 80 - 120cm wide

Max user weight of 320kg

Gently tilts the user throughout left-neutral-right

Auto deflate CPR function

20-25 degree cell inflation to redistribute body weight and offload pressure points

Intelligent Bluetooth connection to App to remotely adjust functions

Advanced buttons on pump faceplate including a pause button

3 year warranty

Easy fit under mattress

We offer bespoke quotes if required.
